

## APPENDIX 4: INACTIVE PROJECTS

This appendix contains all jurisdictions' inactive (completed, deleted or deferred) projects from the 2012 hazard mitigation plan.

- If the project was completed or deleted in 2012, in 2017 the project was removed.
- Projects that are “Complete with 2017 update” mean that the update of this hazard mitigation plan will render the project completed.
- Many projects listed in this section have become part of normal day-to-day agency mitigation activities and therefore have been deleted as a one-time project. These are noted as “Deleted – Action is part of day-to-day responsibilities of government.”

TABLE: 5.4.1 BARBOUR COUNTY INACTIVE PROJECTS			
Project #	Project	Status	Narrative
1.1.2	Recommend revisions to requirements for development within the floodplain, where appropriate	Deleted	Action is part of day-to-day responsibilities of government.
1.1.3	Monitor new stream gauges more effectively to allow more warning time.	Deleted	Project is a preparedness, not mitigation action.
1.2.1	Update floodplain data as it is made available following the revision of the state information	Deleted	Action is part of day-to-day responsibilities of government.
1.2.3	Identify surface water drainage obstructions for all parts of Barbour County including municipalities.	Deleted	Action is part of day-to-day responsibilities of government.
1.2.4	Utilize the established framework of compiled data and continue to coordinate surface water management plans throughout the county	Deleted	Action is part of day-to-day responsibilities of government.
2.1.1	More effectively use strategies in place for debris management from severe storm events and continue to improve these strategies as problems arise within the county and municipalities	Deleted	Project is a preparedness, not mitigation action.
2.1.2	Improve programs implemented to coordinate maintenance and mitigation activities to reduce risk to public infrastructure from severe storms	Deleted	Project does not align with county priorities at this time.
2.1.3	Continue developing and implementing programs to keep trees from threatening lives, property, and public infrastructure during severe storm events	Deleted	This project is coordinated by utility companies by maintaining trees around lines.
2.2.1	Use newspapers to help increase public awareness of severe storm mitigation activities	Deleted	Media is generally used to provide information on all hazards.
2.2.2	Continue monitoring weather to attain earlier severe storm warnings	Deleted	Project is a preparedness, not mitigation action..
2.2.3	Update maps and publicize locations around the county that have the highest incidences of extreme storms	Deleted	All parts of the county are generally susceptible to severe weather.

TABLE: 5.4.1 BARBOUR COUNTY INACTIVE PROJECTS			
Project #	Project	Status	Narrative
2.2.4	Encourage/recommend electrical utilities to use underground construction methods where possible to reduce power outages from severe storms	Deleted	This project would require coordination with the utility companies. The county would support such actions but cannot initiate this project.
2.2.5	Encourage/recommend improved building materials and techniques when rebuilding damaged property	Deleted	Most grants that provide for structures to be repaired or rebuilt have requirements that must be met.
3.1.1	Continue improving information made available to increase public awareness of water supply concerns	Deleted	There has been little public interest in such programs.
3.1.2	Continue current study to evaluate supply alternatives and feasibility	Deleted	This project would need to be coordinated by PSDs. There has been little interest in pursuing at this time.
3.1.3	After completion of current study develop emergency water supply protocol	Deleted	This project would need to be coordinated by PSDs. There has been little interest in pursuing at this time.
3.1.4	Coordinate water construction improvements within county in order to maintain adequate supply	Deleted	This project would need to be coordinated by PSDs. There has been little interest in pursuing at this time.
3.1.5	Maintain new facilities and continue progress on new construction projects	Deleted	This project would need to be coordinated by PSDs. There has been little interest in pursuing at this time.
3.2.1	Use current study data to improve public water sources through supply sources such as river intakes, reservoirs, and aquifers	Deleted	This project would need to be coordinated by PSDs. There has been little interest in pursuing at this time.
4.1.1	Prioritize mitigation projects based upon inventories of buildings and investments.	Deleted	Project is a preparedness, not mitigation action..
4.1.2	Continue to pursue funding opportunities to develop and implement local and county mitigation activities	Deleted	Project is a preparedness, not mitigation action..
4.1.3	Continue to maintain Hazard Mitigation Committee participation in HMP activities	Deleted	Due to regional planning, county hazard mitigation committee is no longer active. County provides representation to a regional committee.
4.1.4	Identify , improve, and sustain collaborative programs focusing on the real estate and insurance industries, public and private sector organization, and individuals to avoid activates that increase risk to hazards	Deleted	There has been little public interest in such programs.
4.1.6	Integrate the goals and action items from the Barbour County Hazard Mitigation Plan into existing regulatory documents and programs where appropriate	Deleted	Plan integration should be on a continuous basis and is note solely a mitigation project.
4.2.1	Strengthen emergency services preparedness and response by linking emergency services with hazard mitigation programs, and enhancing public education	Deleted	This action is aimed at preparedness, not mitigation and there has been little interest.
4.2.2	Develop , enhance, and implement education programs aimed at mitigating hazards, and reducing the risk to citizens, public agencies, private property owners, businesses, and schools	Deleted	There has been little public interest in such programs.

<b>TABLE: 5.4.1 BARBOUR COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
4.3.1	Develop and maintain a list of possible funding sources to address multiple hazards.	Deleted	Project is a preparedness, not mitigation action.

<b>TABLE: 5.4.2 BRAXTON INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
1.1.1	Identify storm water back-up areas, determine costs to correct areas, find funding	Deleted	Does not align with county priorities
1.2.1	Determine funding requirements and seek funding to clear out blocked culverts and determine which culverts need to be re-designed to meet increased flood demands	Deleted	Does not align with county priorities
1.3.1	Maintain a database of all at risk structures in floodway and floodplain and get homeowners and business information on the importance of purchasing flood insurance and flood-proofing techniques to protect their homes and business.	Deleted	Does not align with county priorities
1.3.2	Establish an ongoing program of mitigation training for public officials and private business, as well as the citizens of Braxton county. This training will include building inspectors, builders, developers, surveyors, and community CEO's.	Deleted	Does not align with county priorities
1.7.1	Work with the WVDOH to design road construction to be at the 100 year base flood elevation or higher	Deleted	Does not align with county priorities
2.1.1	Continue to enhance and upgrade current snow removal capabilities throughout the county	Deleted	Does not align with county priorities
2.1.3	Develop and implement programs to keep trees from threatening lives, property, and public infrastructure during severe storm events.	Deleted	Does not align with county priorities
2.2.1	Increase public awareness of severe storm mitigation activities	Deleted	Does not align with county priorities
2.2.2	Enhance weather monitoring to attain earlier severe storm warnings	Deleted	Does not align with county priorities
3.1.2	Support the development of and funding for an "Early Warning System" or WARN	Deleted	Does not align with county priorities
4.1.1	Coordinate with the National Weather Service in Charleston, WV to warn residents of impending severe wind or tornado conditions	Deleted	Does not align with county priorities
4.1.2	Continue to monitor countywide building codes, which will regulate the materials used in buildings that are constructed with respect to design and wind speed	Deleted	Does not align with county priorities
5.1.1	Continue to monitor countywide building permits, which will regulate land disturbances over one acre to include storm water management	Deleted	Does not align with county priorities

<b>TABLE: 5.4.2 BRAXTON INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
6.1.1	Develop an informational brochure to provide opportunities for the citizens of Braxton County to better understand the probability of an earthquake happening and what to do to prepare for an earthquake	Deleted	Does not align with county priorities
7.1.1	Implement a water study and analyze the data to better help citizens during periods of drought	Deleted	Does not align with county priorities
7.1.2	Identify and maintain backup water supplies to make water available to citizens	Deleted	Does not align with county priorities
8.1.1	Build partnerships with local media and providing technical assistance to help them better report, to the public, on how to protect themselves and their property against hailstorm	Deleted	Does not align with county priorities
9.1.1	Distribute an informational brochure including information on the burning ban and leading causes of wildfires, as well as steps the general public can take to avoid starting wildfire	Deleted	Does not align with county priorities
10.1.1	Develop and distribute an informational brochure to all governmental, state, and critical facilities describing the proper policies and procedures to be conducted in the event of a terrorist threat	Deleted	Does not align with county priorities
11.1.2	Have commodity flow studies done to better analyze the types and quantities of materials could be present in the county	Deleted	Does not align with county priorities
11.1.3	Continue to coordinate with the Regional Response Team in order to provide a fast and effective response to an incident	Deleted	Does not align with county priorities
13.1.1	Coordinate with assets within the county to more effectively estimate losses from a disaster	Deleted	Does not align with county priorities

<b>TABLE: 5.4.3 BURNSVILLE INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
12.1.1	Develop a partnership with appropriate parties that are stakeholders in the monitoring and general condition of dams throughout Braxton County. Provide technical and manpower support to evaluate the status of these dams and report to the core planning team on a yearly basis.	Deleted	Braxton County Emergency Management is in regular contact with the USACE.

<b>TABLE: 5.4.4 GASSAWAY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
12.1.1	Develop a partnership with appropriate parties that are stakeholders in the monitoring and	Deleted	Braxton County Emergency Management is in regular contact with the USACE.

	general condition of dams throughout Braxton County. Provide technical and manpower support to evaluate the status of these dams and report to the core planning team on a yearly basis.		
--	--	--	--

<b>TABLE: 5.4.5 SUTTON INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
12.1.1	Develop a partnership with appropriate parties that are stakeholders in the monitoring and general condition of dams throughout Braxton County. Provide technical and manpower support to evaluate the status of these dams and report to the core planning team on a yearly basis.	Deleted	Braxton County Emergency Management is in regular contact with the USACE.

<b>TABLE: 5.4.6 GILMER COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
1.1.1	Research funding sources for identifying problem areas and how to implement projects	Status	Project is a preparedness, not mitigation action..
1.1.2	Re-evaluate repair costs compared to continuous rebuild/repair costs	Status	Current personnel and elected officials not familiar with project.
1.1.4	Continue to enforce/modify Floodplain Ordinances as deficiencies are identified	Deleted	Action is part of day-to-day responsibilities of government.
1.1.5	Install rain gauges throughout the county to monitor rainfall	Deleted	Current personnel and elected officials not familiar with project.
1.1.6	Coordinate county efforts to meet the requirements of becoming a participant in the CRS	Deferred	Project is not feasible at this time.
2.1.1	Implement a research project to identify weaknesses in supply security	Deleted	Current personnel and elected officials not familiar with project.
2.1.2	Identify measures to prevent GCI water supply contamination	Deleted	Current personnel and elected officials not familiar with project.
3.1.1	Proactively redistribute information on how to better prepare for emergencies	Deleted	Current personnel and elected officials not familiar with project.
3.2.1	Work with the Dean of Glenville State College to promote preparedness	Deleted	There has been little public interest in such programs.

<b>TABLE: 5.4.7 GLENVILLE INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>

1.1.2	Re-evaluate repair costs compared to continuous rebuild/repair costs	Deleted	Due to change in personnel and elected officials, project is not a priority at this time.
1.1.5	Install rain gauges to monitor rainfall	Deleted	Due to change in personnel and elected officials, project is not a priority at this time.
1.1.6	Meet requirements of becoming a participant in the CRS	Deleted	Due to change in personnel and elected officials, project is not a priority at this time.

TABLE: 5.4.8 LEWIS COUNTY INACTIVE PROJECTS			
Project #	Project	Status	Narrative
1.1.1	Identify storm water "back-up" areas, determine costs to correct areas, find funding.	Deleted	Due to change in personnel and elected officials, priorities for the county have changed.
1.2.1	Meet with the WVDOH to develop and implement a regular culvert clearing procedure and determine which culverts need to be re-designed to meet increased flood demands	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.2.2	Coordinate inspections of bridges and roadways that are at risk in the special flood hazard area. Develop a plan to protect this infrastructure	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.3.3	Coordinate with appropriate officials to develop a master plan for the 4-H property along Jesse's Run (Property is in floodplain)	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.3.5	Continue to monitor development in flood prone areas by enforcing the county's floodplain ordinance	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.4.1	Establish an ongoing program of mitigation training for public officials and private business, as well as the citizens of Lewis County. A target audience should include building inspectors, builders, developers, surveyors, and community CEOs. This training should include the <i>"No Adverse Impact" Toolkit for Common Sense Floodplain Management</i>	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.5.1	Review, update, comply, and enforce, all Lewis County and Municipalities' floodplain management ordinances	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.6.1	Enter into a cooperating partnership "CTP" with DHS/FEMA to help develop Lewis County Digital Flood Insurance Rate Map (DFIRM), which will help in future floodplain development issues	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
1.6.2	Support the findings of the West Virginia Flood Protection Task Force and help promote these findings to the leadership and citizenry of Lewis County. Provide local representation and support for the West Virginia State Floodplain Managers Association	Deleted	Due to change in personnel and elected officials, priorities for the county have changed

TABLE: 5.4.8 LEWIS COUNTY INACTIVE PROJECTS			
Project #	Project	Status	Narrative
1.8.1	Seek funding to elevate existing at-risk roadways throughout the county	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
2.1.1	Coordinate with the West Virginia Division of Highways to create more contracts for emergency snow removal so as to increase the amount of snow removal equipment on county routes to speed up the snow removal process	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
3.1.1	Distribute public information to appropriate agencies and organizations throughout Lewis County	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
3.2.1	Partner with federal, state, and local agencies and organizations to develop an early warning system for multi-hazards	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
4.1.1	Provide information on what to do if severe winds or a tornado should occur in Lewis County. Make certain that this information is available at public libraries for the citizens	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
4.1.2	Promote the NWS "Storm Ready Program"	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
5.1.5	Work with the state Division of Forestry to coordinate efforts to promote re-seeding after extraction occurs in the timber industry	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
5.2.1	Develop a GIS-based database that will help identify the areas of potential land subsidence. Make this mapping product available for the Lewis County All Hazard Map. The map can be utilized to protect against improper development	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
6.1.1	Develop an informational brochure explaining the potential for earthquakes, as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe proof homes and other structures from the potential effects of earthquakes. Provide this information at the public libraries for the public to view.	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
7.1.1	Develop a portable bulk water system that can be moved where it is needed during severe drought conditions	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
7.1.2	Coordinate with the local fire departments to haul water upon request to county residents and facilities	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
8.1.1	Build partnerships with local media and provide technical assistance to help them better report, to the public, on how to protect themselves and their property	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
9.1.1	Develop relationships with newspaper and TV outlets and have them report on this hazard (wildfire) during the fire season. Place similar literature in public libraries that will be available to the public	Deleted	Due to change in personnel and elected officials, priorities for the county have changed

TABLE: 5.4.8 LEWIS COUNTY INACTIVE PROJECTS			
Project #	Project	Status	Narrative
10.1.1	Develop a database of at risk citizens with health problems (e.g., oxygen requirements) that need electricity. Coordinate access to existing databases maintained by power companies, if applicable. Further, coordinate with the local power company to service these at risk citizens first after a power outage.	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
11.1.1	Seek funding to coordinate qualified HAM operators to assist in disasters	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
11.1.2	Continually update communications contact information. Simultaneously ensure that individual agencies are maintaining communications systems	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
11.1.3	Encourage county agencies to sign agreements with one another to ensure that if one department's radios are inoperable, they can utilize extra radios maintained by other county departments	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
12.1.1	Develop and distribute an informational brochure to all governmental, state, and critical facilities (such as schools) describing the proper guidelines to be conducted in the event of a bomb threat	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
13.1.1	Coordinate with local officials and representatives from organizations holding tier II permits to produce a more detailed plan on how to handle spills and evacuations procedures	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
14.1.1	Continue partnerships with appropriate parties in the monitoring and general condition of dams throughout Lewis County.	Deleted	Due to change in personnel and elected officials, priorities for the county have changed
15.1.1	Work with appropriate agencies (power companies, board of education, home health services, etc.) to compile a special needs inventory for Lewis County and the municipalities therein	Deleted	Due to change in personnel and elected officials, priorities for the county have changed

TABLE: 5.4.9 JANE LEW INACTIVE PROJECTS			
Project #	Project	Status	Narrative
1.1.1	Identify storm water "back-up" areas, determine costs to correct areas, find funding.	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.2.1	Meet with the WVDOH to develop and implement a regular culvert clearing procedure and determine which culverts need to be re-designed to meet increased flood demands	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.

TABLE: 5.4.9 JANE LEW INACTIVE PROJECTS

1.2.2	Coordinate inspections of bridges and roadways that are at risk in the special flood hazard area. Develop a plan to protect this infrastructure	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.2.3	Replace the wooden bridge in Jane Lew	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.2.4	Repair the US Route 19 (Main Street) bridge structure and sidewalk in Jane Lew	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.3.1	Enforce building codes and educate citizens about hazards	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.3.2	Promote buying flood insurance to homeowners and business owners	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.4.1	Establish an ongoing program of mitigation training for public officials and private business, as well as the citizens of Lewis County. A target audience should include building inspectors, builders, developers, surveyors, and community CEOs. This training should include the <i>"No Adverse Impact" Toolkit for Common Sense Floodplain Management</i>	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.5.1	Review, update, comply, and enforce, all Lewis County and Municipalities' floodplain management ordinances	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.6.1	Enter into a cooperating partnership "CTP" with DHS/FEMA to help develop Lewis County Digital Flood Insurance Rate Map (DFIRM), which will help in future floodplain development issues	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.6.2	Support the findings of the West Virginia Flood Protection Task Force and help promote these findings to the leadership and citizenry of Lewis County. Provide local representation and support for the West Virginia State Floodplain Managers Association	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.7.2	The Jane Lew Water Commission Office and the water treatment plant are at risk and have had some flood damage in the past. Build a levee or develop another flood-proof method for the Jane Lew water treatment plant	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.

<b>TABLE: 5.4.9 JANE LEW INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
1.7.3	Muskrats are creating bank erosion along Hackers Creek and traps are needed to catch the muskrats. Coordinate with local WVDNR officials to trap muskrats	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
1.8.1	Seek funding to elevate existing at-risk roadways throughout the county	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
2.1.1	Coordinate with the West Virginia Division of Highways to create more contracts for emergency snow removal so as to increase the amount of snow removal equipment on county routes to speed up the snow removal process	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
3.1.1	Distribute public information to appropriate agencies and organizations throughout Lewis County	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
4.1.1	Provide information on what to do if severe winds or a tornado should occur in Lewis County. Make certain that this information is available at public libraries for the citizens	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
4.1.2	Promote the NWS "Storm Ready Program"	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
4.2.1	Promote any new construction and/or roof remodeling at the municipal level to be designed to withstand 90 MPH winds	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
5.1.1	Promote DEP storm water management permitting at the municipal level to regulate any land disturbance and development over one acre to provide for land stabilization through storm water management techniques	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
5.2.1	Develop a GIS-based database that will help identify the areas of potential land subsidence. Make this mapping product available for the Lewis County All Hazard Map. The map can be utilized to protect against improper development	Deleted	New personnel and elected officials are unfamiliar with 2012 plan.
6.1.1	Develop an informational brochure explaining the potential for earthquakes, as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe proof homes and other structures from the potential effects of earthquakes. Provide this information at the public libraries for the public to view.	Deleted	New elected officials were not part of the 2012 planning process.
7.1.2	Coordinate with the local fire departments to haul water upon request to county residents and facilities	Deleted	New elected officials were not part of the 2012 planning process.
8.1.1	Build partnerships with local media and provide technical assistance to help them better report, to the public, on how to protect themselves and their property	Deleted	New elected officials were not part of the 2012 planning process.
9.1.1	Develop relationships with newspaper and TV outlets and have them report on this hazard (wildfire) during the fire season. Place similar literature in public libraries that will be available to the public	Deleted	New elected officials were not part of the 2012 planning process.
10.1.1	Develop a database of at risk citizens with health problems (e.g., oxygen requirements) that need electricity. Coordinate access to existing databases maintained by power companies, if applicable. Further, coordinate with the local power company to service these at risk citizens first after a power outage.	Deleted	New elected officials were not part of the 2012 planning process.
11.1.1	Seek funding to coordinate qualified HAM operators to assist in disasters	Deleted	New elected officials were not part of the 2012 planning process.
11.1.2	Continually update communications contact information. Simultaneously ensure that individual agencies are maintaining communications systems	Deleted	New elected officials were not part of the 2012 planning process.
12.1.1	Develop and distribute an informational brochure to all governmental, state, and critical facilities (such as schools) describing the proper guidelines to be conducted in the event of a bomb threat	Deleted	New elected officials were not part of the 2012 planning process.
13.1.1	Coordinate with local officials and representatives from organizations holding tier II permits to produce a more detailed plan on how to handle spills and evacuations procedures	Deleted	New elected officials were not part of the 2012 planning process.
14.1.1	Continue partnerships with appropriate parties in the monitoring and general condition of dams throughout Lewis County.	Deleted	New elected officials were not part of the 2012 planning process.

<b>TABLE: 5.4.10 WESTON INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
15.1.1	Work with appropriate agencies (power companies, board of education, home health services, etc.) to compile a special needs inventory for Lewis County and the municipalities therein	Deleted	New elected officials were not part of the 2012 planning process.

<b>TABLE: 5.4.11 RANDOLPH COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
1.1.2	Identify a drought response official to monitor weather conditions	Completed	OEM has designated personnel to monitor weather conditions.
1.1.3	Identify large water consumers and develop individual drought response plans	Completed	Local PSDs have identified large water consumers and will continue to work with them and the county.
1.1.4	Implement water conservation techniques early, using rationing only as a last resort	Completed	Local PSDs will work with the county to issue conservation techniques as drought events are identified.
1.2.1	Provide information to the public regarding drought and drought response plans	Completed	Local PSDs will issue notices with bills and other correspondence.
1.2.2	Develop water conservation tips and distribute to the general public via utility statements, media releases, etc.	Completed	Local PSDs will issue notices with bills and other correspondence.
3.1.1	Publish public service announcements through local media (newspaper, radio, television) concerning an epidemic and what steps to take to eliminate it	Deleted	Project would need to be coordinated by DHHR or local health department.
3.2.1	Coordinate with county and state health officials to store necessary medications and supplies for either a naturally-spread epidemic or a deliberately-spread epidemic	Deleted	Project would need to be coordinated by DHHR or local health department.
4.1.1	Develop zoning regulations and floodplain management regulations that will establish criteria for property construction in a floodplain	Completed	Floodplain regulations are in place as required by the NFIP.
4.1.2	Enforce ordinances that are already in place	Deleted	Action is part of day-to-day responsibilities of government.
4.2.1	Continue to maintain areas in the county that are designated as open space as such	Deleted	Action is part of day-to-day responsibilities of government.
4.4.1	Coordinate county efforts to meet the requirements of becoming a participant in the CRS	Deleted	Does not align with county priorities.
4.5.1	Install devices along roadways to measure the depths of flood waters, thus notifying individuals attempting to cross if the waters are too deep	Deleted	Does not align with county priorities.
5.1.1	Provide local residents with more advance warning of impending hailstorms	Deleted	Project is a preparedness, not mitigation action.

<b>TABLE: 5.4.11 RANDOLPH COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
6.1.1	Undertake efforts to map areas of subsidence and landslides and distribute such information to the public	Completed	Digital interactive map has been established on the Assessor's homepage.
6.1.2	Encourage residents living in landslide or subsidence-prone areas to be properly insured	Deleted	Project is a preparedness, not mitigation action.
6.2.1	Enforce existing building codes that are currently in place	Deleted	Action is part of day-to-day responsibilities of government.
6.2.2	Evaluate building codes to see if any revisions can be made to protect residents from landslide or subsidence damage	Deleted	Does not align with county priorities.
7.1.2	Continue to utilize existing advance warning systems throughout the county	Deleted	Project is a preparedness, not mitigation action.
8.1.1	Coordinate with the National Weather Service in Charleston, West Virginia to warn residents of impending severe wind or possible tornado conditions	Deleted	Project is a preparedness, not mitigation action.
8.1.2	Monitor NOAA Weather Radios for tornado watches and warnings, particularly in the spring and summer months	Deleted	Project is a preparedness, not mitigation action.
11.2.1	Publicize evacuation plans	Completed	OEM has made plans available to public.
11.1.3	Work with facilities that store hazardous chemicals to develop emergency action plans	Deleted	Most businesses that store chemicals are required by law to establish plans
11.2.2	Facilitate the creation of safe zones as places residents can go in the event of a hazardous materials incident. Further, publicize the location and access to these safe zones	Deleted	Due to the varying evacuation distances and multiple travel routes through the county, safe zones would be dictated by a specific event
12.1.3	Maintain a working relationship among local, state, and federal law enforcement agencies	Deleted	Action is part of day-to-day responsibilities of government.
12.1.4	Coordinate with local media to alert the public as to current threat status	Deleted	Action is part of day-to-day responsibilities of government.
12.2.1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist event	Deleted	Davis Memorial Hospital is responsible for trauma center determination.

<b>TABLE: 5.4.12 BEVERLY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
3.1.1	Publish public service announcements through local media (newspaper, radio, television) concerning an epidemic and what steps to take to eliminate it	Deleted	Project would need to be coordinated by DHHR or local health department
8.1.3	Encourage families, schools, and communities to prepare response plans for severe wind and/or tornado events	Deleted	There has been little public interest in such programs.
8.2.1	Encourage residents and businesses to strengthen the most vulnerable spots in their structures, such as the roof, window, and doors	Deleted	New personnel and elected officials not familiar with project.

<b>TABLE: 5.4.13 COALTON INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
2.1.1	Develop an informational brochure explaining the potential for earthquakes, as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes	Deleted	Project does not align with municipalities current priorities.
2.1.2	Review current building codes to ensure that critical facilities are being constructed to seismic strength	Deleted	Project does not align with municipalities current priorities.
3.1.1	Publish public service announcements through local media (newspaper, radio, television) concerning an epidemic and what steps to take to eliminate it	Deleted	Project does not align with municipalities current priorities.
3.2.1	Coordinate with county and state health officials to store necessary medications and supplies for either a naturally-spread epidemic or a deliberately-spread epidemic	Deleted	Project does not align with municipalities current priorities.
4.1.1	Develop zoning regulations and floodplain management regulations that will establish criteria for property construction in a floodplain	Deleted	Project does not align with municipalities current priorities.
4.1.2	Enforce ordinances that are already in place	Deleted	Project does not align with municipalities current priorities.
4.4.1	Coordinate county efforts to meet the requirements of becoming a participant in the CRS	Deleted	Project does not align with municipalities current priorities.
6.2.1	Enforce existing building codes that are currently in place	Deleted	Project does not align with municipalities current priorities.
6.2.2	Evaluate building codes to see if any revisions can be made to protect residents from landslide or subsidence damage	Deleted	Project does not align with municipalities current priorities.
7.1.2	Continue to utilize existing advance warning systems throughout the county	Deleted	Project does not align with municipalities current priorities.
8.1.1	Coordinate with the National Weather Service in Charleston, West Virginia to warn residents of impending severe wind or possible tornado conditions	Deleted	Project does not align with municipalities current priorities.
8.1.2	Monitor NOAA Weather Radios for tornado watches and warnings, particularly in the spring and summer months	Deleted	Project does not align with municipalities current priorities.

<b>TABLE: 5.4.14 ELKINS INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
3.1.1	Publish public service announcements through local media (newspaper, radio, television) concerning an epidemic and what steps to take to eliminate it	Deleted	Project would need to be coordinated by DHHR and local health departments

3.2.1	Coordinate with county and state health officials to store necessary medications and supplies for either a naturally-spread epidemic or a deliberately-spread epidemic	Deleted	Project would need to be coordinated by DHHR and local health departments
4.1.1	Develop zoning regulations and floodplain management regulations that will establish criteria for property construction in a floodplain	Completed	Floodplain permitting is required for construction in Elkins.
4.1.2	Enforce ordinances that are already in place	Deleted	Action is part of day-to-day responsibilities of government.
4.4.1	Coordinate county efforts to meet the requirements of becoming a participant in the CRS	Deferred	Action is part of day-to-day responsibilities of government.
6.2.1	Enforce existing building codes that are currently in place	Deleted	Action is part of day-to-day responsibilities of government.
6.2.2	Evaluate building codes to see if any revisions can be made to protect residents from landslide or subsidence damage	Deleted	Does not align with municipal priorities at this time
7.1.2	Continue to utilize existing advance warning systems throughout the county	Deleted	Action is part of day-to-day responsibilities of government.
8.1.1	Coordinate with the National Weather Service in Charleston, West Virginia to warn residents of impending severe wind or possible tornado conditions	Deleted	Preparedness, not mitigation action.
8.1.2	Monitor NOAA Weather Radios for tornado watches and warnings, particularly in the spring and summer months	Deleted	Preparedness, not mitigation action.
12.1.1	Develop and/or enhance terrorist incident portions of the county Emergency Operations Plan	Deleted	Would need to be coordinated by Randolph County
12.1.2	Monitor suspected terrorist groups	Deleted	Action is part of day-to-day responsibilities of government.

10.2.1	Encourage the use of flame retardant materials in new building construction	Deleted	Newly elected officials and personnel are unaware of any project from the previous planning process.

**TABLE: 5.4.18 TUCKER COUNTY INACTIVE PROJECTS**

Project #	Project	Status	Narrative
1.1.2	Enforcement of Flood Plain Ordinance (Flood)	Deleted	Day-to-day operations, not mitigation project
1.1.3	Adopt county wide building codes which will regulate the number of structures and material used in construction of buildings (Flood)	Deleted	Project not feasible at this time. County has a planner who does oversee development through permitting
2.1.2	Provide potable drinking water (Drought)	Deleted	Action not mitigation project
3.1.1	Emergency Management Institute Training (Hazmat)	Deleted	Action not mitigation project
4.1.1	Create safety zones around structures (Wildfires)	Deleted	Project does not align with priorities.
4.2.1	Distribute flyers and do public service announcements (Wildfires)	Deleted	Information is already provided by DNR and U.S. National Park Service
5.1.1	Public education on how to protect your family in the event of an earthquake (Geological Hazards)	Deleted	Project does not align with priorities.
5.1.2	Enforcement of building codes (Geological Hazards)	Deleted	Day-to-day operations, not mitigation project
6.1.1	Public service announcements describing radon gas (Radiological)	Deleted	Project does not align with priorities.
6.1.2	Radon testing (Radiological)	Deleted	Project does not align with priorities.
7.1.1	Coordination of effort and information (Terrorism)	Deleted	Day-to-day operations, not mitigation project
8.1.1	Improve mapping of mined areas (Land Subsidence)	Deleted	The WVGES has provided public use, online, interactive mapping.
9.1.1	Public education and awareness (Tornado)	Deleted	Project does not align with priorities.
9.1.2	Distribute NOAA weather radios (Tornado)	Deleted	Project not economically feasible.
10.1.1	Distribute NOAA weather radios (Winter)	Deleted	Project not economically feasible.
10.1.2	Identify shelters and enact building standards or weight restrictions on roofs (Winter)	Deleted	Action not mitigation project.

**TABLE: 5.4.19 PARSONS INACTIVE PROJECTS**

Project #	Project	Status	Narrative
N/A	Work with the County OES Director, FEMA, City & County Governments, Department of Highways, National Weather Service, Fire & EMS Personnel, 9-1-1 Director, National Guards, Citizens/Residents, Electric & Phone Companies, and the County Humane Society. Improve City and County building codes & flood ordinances. (Flood)	Deleted	Municipal officials focus is on maintaining CRS status.

N/A	Work with the Department of Highways, OES office, etc. to haul potable water. (Drought)	Deleted	Action not mitigation action
N/A	Work with Department of Environmental Protection, Land and Soil Conservation, Division of Natural Resources, U.S. National Forestry Service, Fire & EMS Personnel, 9-1-1 Director, County OES Director, Public Service Commission and FEMA. (Hazmat)	Deleted	Project does not align with municipal priorities.

<b>TABLE: 5.4.20 UPSHUR COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
1.2.1	Coordinate interagency cooperation to develop emergency routes and signage	Deleted	Project does not align with county priorities
1.3.1	Coordinate county efforts to meet the requirements of becoming participants in the CRS	Deleted	Project is not feasible at this time
1.3.3	Use the municipal code as a model for developing a countywide permitting process to supplement the measures taken by lending institutions to monitor new construction in the floodplain	Completed	New building and permitting regulations completed in June 2012.
2.1.1	Consider developing a permitting process to make sure structures are built in accordance with the International Building Code (IBC) with respect to materials used, roof strengths, load bearing requirements, etc.	Deleted	Project does not align with priorities
3.1.1	Coordinate with the National Weather Service in Charleston to warn residents of impending severe thunderstorm conditions	Deleted	Project focuses on preparedness not mitigation
3.1.2	Install additional rain gauges at strategic points throughout the county	Deleted	Project does not align with priorities
4.1.1	Encourage insurance providers - through public awareness campaigns - to discuss coverage options regarding hail damage with customers	Deleted	Project had little public interest or support.
5.1.1	Develop an information brochure to distribute to local residents	Deleted	Project does not align with priorities
6.1.1	Coordinate with the WVDOH to better clarify reporting procedures should landslides block road.	Completed	WVDOH has clarified reporting process for landslides involving state maintained roadways
7.1.1	Coordinate with the NRCS and/or dam owners to develop a detailed map showing areas that would be affected by a dam failure	Deleted	Project is not feasible at this time
7.1.3	Coordinate with dam owners to update notification and response plans to be more compatible with the county's emergency operations plan	Deleted	Project is not feasible at this time
8.1.1	Develop an informational brochure explaining the minimal earthquake risk in Upshur County	Deleted	Project does not align with priorities
10.1.1	Cooperate with public awareness campaigns undertaken by state and other agencies aimed at forest fire prevention	Deleted	Action is part of day-to-day responsibilities of government.

<b>TABLE: 5.4.20 UPSHUR COUNTY INACTIVE PROJECTS</b>			
<b>Project #</b>	<b>Project</b>	<b>Status</b>	<b>Narrative</b>
10.1.2	Broaden public information campaigns to include identification of the potential fire dangers surrounding abandoned houses. Consider targeting said campaigns at youth populations	Deleted	There has been little public interest in such programs
10.1.3	Coordinate with the appropriate agencies regarding improved ISO ratings throughout the county	Deleted	Project does not align with county priorities
11.1.1	Supply critical infrastructure with NOAA radios and/or other early warning systems	Deleted	Project does not align with county priorities
11.1.2	Install new or upgrade alarms at fire stations that sound different tones corresponding to different hazards	Deleted	Project is not feasible at this time
11.1.3	Research options regarding the purchase and installation of a reverse 911 system	Completed	County 911 uses Nixle system
11.2.1	Update studies to continually monitor the changing hazardous material risk	Deleted	Action is part of day-to-day responsibilities of government.
11.2.2	Continue the "off-site" planning process with SARA-regulated facilities	Deleted	Action is part of day-to-day responsibilities of government.
11.3.1	Coordinate with well services and drilling companies to ensure that their efforts to do not, to the extent possible impact the local water supply	Deleted	Well services have government oversight. Project is redundant.
11.3.2	Coordinate with well service companies to identify what types of hazardous materials are traveling through the area	Deleted	This information is available through the county CFS.

<b>TABLE: 5.4.21 BUCKHANNON INACTIVE PROJECTS</b>
